“Whether you are an amateur sports photographer looking to turn pro, a student looking for tips to improve or someone fresh out of school looking into future career ideas, this book will provide you with valuable tips and strategies for mastering the art and business of sports photography.” – Al Macphee.

In this book, Al shares his invaluable knowledge, gleaned from decades in the field, to set you up for life as an in demand sports photographer.

About the author:

Al started taking photos with the armed forces in 1981, honing his action photography skills in various conflict zones and humanitarian operations. He then moved into TV and film-making before earning a place on the exclusive Royal List, permitting him to photograph the Royal Family on visits around the world.

In 1998, Al came to sunny Devon for a holiday and liked it so much he settled. He now shares his dream house in Paignton with his partner, cat and two dogs.

Al runs his own small photography business. Much of his work involves sports, especially football, cycling, triathlons, rugby and equestrian events.
